

AI Prompt Logs

Date	19 June 2026
Team ID	
Project Name	EcoTrack - Personal Carbon AI Footprint Tracker
Maximum Marks	3 Marks

AI Prompt Logs:

Maintaining a structured record of your interactions with Large Language Models ensures reproducibility and tracks your prompt engineering iterations. Document your exact prompts, the system context provided, and the resulting outputs to demonstrate how AI accelerated your development phase.

S · N	Task / Intent	System Prompt & Context	Exact User Prompt	AI Output Summary	Refinemen ts / Iterations
1	Generate Flask API Boilerplate	Groq / ChatGPT	"Create Flask REST API endpoints for user habit logging, streak calculation, & Groq LLM swap suggestions."	Flask API routes, CORS handlers, and JSON request/response schema.	Integrated Firebase Firestore SDK for persistent database sync.
2	Build Chart.js Analytics & Gauge	Claude 3.5 Sonnet	"Design React responsive glassmorphism daily CO2 gauge and 30-day emission trend line charts."	React dynamic gauge component & Chart.js options config.	Applied custom HSL eco-palette and Tailwind dark mode styling.
3	Implement AI Eco-Swaps System	Groq LLaMA 3.3	"Generate targeted lifestyle carbon offset tips with estimated CO2 savings based on daily commuting & diet."	Structured JSON recommendations array with CO2 reduction metrics.	Added local client caching to support offline demo fallback.
