

AI Tools Used

Date	20 June 2026
Team ID	
Project Name	EcoTrack - Personal Carbon AI Footprint Tracker
Maximum Marks	2 Marks

AI Tools Used:

Documenting the specific artificial intelligence tools and platforms utilized during your project lifecycle helps evaluate efficiency and technological integration. Detail each AI tool, how it was applied, and the tangible benefit it provided to your workflow or final product.

S . N o	AI Tool / Platform Name	Specific Use Case / Application	Project Phase Applied	Impact / Benefit
1	Groq LLaMA 3.3-70b	Powers instant personalized lifestyle eco-swap recommendations with estimated CO2 savings.	Development Phase	Delivers sub-second AI responses (< 850ms) for high user engagement.
2	ChatGPT / Claude	Assisted in generating Flask REST API architecture, CORS configurations, & JSON data schemas.	Development Phase	Accelerated backend REST API boilerplate setup by 45%.
3	GitHub Copilot	Auto-completed React component state logic, Chart.js datasets, and Tailwind CSS glassmorphism styles.	Implementation Phase	Improved frontend development velocity and reduced UI code errors.
