

Project Executable Files & Execution Guide

Date	27 June 2026
Team ID	
Project Name	EcoTrack - Personal Carbon AI Footprint Tracker
Maximum Marks	3 Marks

Project Executable Files & Execution Guide:

To successfully evaluate your project, evaluators require access to your source code, live deployments, and clear instructions on how to build and run your application locally. Complete the sections below to document your project repositories and execution steps.

Step 1: Project Links & Access

Resource Type	URL / Access Link
Source Code Repository (GitHub)	https://github.com/RakeshRegala/Eco-Tracker
Live Deployed Application (Vercel SPA)	https://eco-track-carbon-ai.vercel.app
Demo Video Link (YouTube Walkthrough)	https://youtu.be/ecotrack-demo-2026

Step 2: Key Executable Files & Folder Structure

Briefly explain the primary directories and where the core execution files are located within your repository.

S.No	Folder / File Name	Description & Purpose
1	src/ (React Client SPA)	Contains React components, Tailwind UI glassmorphism layout, & Chart.js carbon analytics.
2	backend/app.py (Flask REST Server)	Main backend entry point routing habit logs, streak math, & Groq LLaMA 3.3 AI eco-swaps.
3	backend/firebase_config.py (Cloud Database)	Firebase Firestore NoSQL cloud database setup & Firebase Auth JWT session verifier.
4	.env.example (Environment Template)	Template specifying required environment variables for Groq API keys & Firestore credentials.

Step 3: Local Setup & Execution Instructions

Provide a step-by-step guide to installing dependencies and launching the application on a local machine.

Step	Action / Terminal Command	Expected Outcome / Notes
1	git clone https://github.com/RakeshRegala/Eco-Tracker.git	Clones EcoTrack repository to local development workspace.
2	cd ecotrack/backend && pip install -r requirements.txt	Installs Flask, PyMuPDF, requests, and Firebase Admin SDK.
3	cp .env.example .env (Configure GROQ_API_KEY)	Sets up local API gateway keys and Firestore cloud credentials.
4	python app.py (Backend) & npm run dev (Frontend)	Launches Flask REST server on localhost:5000 and Vite SPA on localhost:5173.
5	Open http://localhost:5173 in Web Browser	Accesses EcoTrack carbon dashboard and completes daily habit logging wizard.
